SUMMARY

Full-stack developer and ML practitioner pursuing B.Tech in EEE at BITS Pilani, Hyderabad (Expected 2028). Interned at PeopleSense.AI, architecting and deploying a real-time crowd analytics platform (MERN + WebSockets) serving enterprise clients with sub-200ms end-to-end latency. Built and shipped 5+ projects spanning fintech ML pipelines, AI-powered export gateways, and social platforms with intelligent friend-matching. Multiple hackathon winner; Student Achievement Award recipient from BITS Pilani Director. Strong in full-stack development, Python, and applied ML.

EDUCATION

Birla Institute of Technology and Science, Pilani

2023 – 2028

B.Tech – Electrical and Electronics Engineering | Pilani, India

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks: React.js, Node.js, Express.js, Next.js, FastAPI, Flask, Socket.io, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, Postman, Docker, Figma

Databases: MongoDB, MySQL, PostgreSQL, Firebase, AWS

Machine Learning: TensorFlow, Scikit-learn, PyTorch, XGBoost

EXPERIENCE

Software Engineer Intern

May 2025 – April 2026

PeopleSense.AI

- Architected Glocal, a real-time crowd analytics platform using React (SPA), Node.js/Express (REST API layer), and MongoDB (document store) for live sensor-data ingestion and visualization across distributed environments.
- Implemented JWT-based authentication, role-based access control (RBAC), and responsive dashboards displaying real-time occupancy heatmaps and crowd-density KPIs for enterprise clients.
- Optimized MongoDB aggregation pipelines and WebSocket event handlers to maintain sub-200 ms end-to-end latency under high concurrent user load in production.

Tech & Research Intern

May 2025 – July 2025

Samvardhan Greenfields

- Conducted research on technology solutions focusing on data analysis and system development; built Python (Pandas/NumPy) pipelines to process and clean large-scale agricultural sensor datasets.
- Evaluated third-party APIs and IoT integration frameworks to support architecture decisions aligned with current industry advancements and operational requirements.

PROJECTS

PlacementOS (UiPath Maestro, LangChain, Groq, FastAPI)

Jun 2026

- Built an end-to-end AI-orchestrated campus placement automation system using UiPath Maestro BPMN and LangChain + Groq (Llama 3); designed a 10-step process covering the full placement lifecycle with AI resume screening (0–100 scoring vs JD) and human-in-the-loop approvals via UiPath Action Center.
- Deployed 3 RPA bots (ERPFetchBot, CalendarEmailBot, PlacementRecordBot) handling scheduling, emails, and ERP updates; reduced a 2-week placement drive to 48 hours.

TradePass – AI-Powered SME Export Gateway (React.js, FastAPI, Gemini API, GLEC Framework)

Jan 2026

- Led Team StackStorm at the DP World National Hackathon (BITS Pilani, Hyderabad Campus) to build an AI-powered conversational export gateway targeting India's 750,000+ SME exporters; delivered NLP-driven HS code classification (92% confidence), pre-submission compliance checking across 4 trade corridors (India → Germany, UAE, Japan, USA), and real-time carbon scoring via the GLEC Framework v3.
- Implemented auto-document generation (invoice, packing list, Certificate of Origin, ESG carbon report) with a 96/100 customs clearance confidence score, identifying ₹1.8L in duty savings per shipment under India–Japan CEPA; Semi-Finalist at DP World National Hackathon 2026.

Library Live Occupancy Dashboard (TypeScript, WebSockets, React)

Jan 2026

- Built a real-time campus library occupancy tracking dashboard for BITS Pilani Hyderabad using TypeScript and live sensor data, displaying area-wise availability and occupancy heatmaps with sub-second update latency.
- Deployed live on campus during BITSAA Global Meet 2026 in collaboration with PeopleSense.AI; recognized with the Student Achievement Award by the Director, BITS Pilani Hyderabad.

DhanMitr – Credit Scoring Platform (XGBoost, Logistic Regression, FastAPI, Flask REST API)

Nov 2025

- Designed a fintech ML pipeline embedding XGBoost and logistic regression models for creditworthiness assessment of low-income beneficiaries, integrating alternative consumption metrics alongside repayment history; achieved 89% AUC on holdout data, reducing manual evaluation time by 60%.
- Exposed scoring logic as a Flask REST API with versioned endpoints and structured JSON response schema; built for Smart India Hackathon 2025 (Problem ID: 25150).

Origo – AI Social Platform (MERN Stack, Python ML, Socket.io)

Sep 2025

- Constructed a MERN stack social platform; integrated a Python ML microservice generating user-interest vector embeddings with cosine-similarity algorithms for intelligent friend-matching.
- Deployed real-time feed updates via Socket.io and won 1st prize at SEEP 3.0 among 150+ competing startups for innovation in AI-driven social connectivity.

LEADERSHIP & AWARDS

Student Achievement Award – Director Prof. D. Sriram, BITS Pilani Hyderabad

Apr 2026

Awarded for leading the first student-led live crowd analytics deployment on campus during BITSAA Global Meet 2026, in collaboration with PeopleSense.AI — a US-based startup founded by Dr. Harsh Verma (BITS Pilani, 1980).

AUTOwn'26 – 1st Place, CyberBeat Project

Feb 2026

1st place at AUTOwn'26 (WILP BITS, Hyderabad) for CyberBeat — a real-time cyber intelligence platform for breach detection and threat monitoring; award presented by the Dean, BITS Pilani Hyderabad Campus.

SEEP 3.0 Winner – 1st Place

Oct 2025

Awarded first prize among 150+ competing startups for Origo, showcasing innovation in AI-driven social platforms.

Greener Cleaner – Second Prize

Aug 2024

Developed Plastic Buster AI to promote sustainability and circular economy practices.

Global Business Competition – Second Prize

Jul 2024

Led a successful initiative for an AI healthcare chatbot at an international business competition.

Outstanding Delegate – AYIMUN

Aug 2023

Awarded Outstanding Delegate at the Asian Youth International Model United Nations for representing Austria.

PROFESSIONAL AFFILIATIONS

- Tech & Operations Lead at ATMOS Tech Fest, BITS Pilani; guiding cross-functional teams in end-to-end event management and technical execution at one of India's largest college tech fests.
- Operations Lead at TEDx BITS Pilani; responsible for ensuring smooth execution and logistics coordination of high-profile intellectual and innovation-focused events.
- Tech Lead at AUGSD, BITS Pilani Hyderabad; leading the technical wing of the central academic guidance body for all first-degree students.

LANGUAGES

English (Professional Proficiency) | Hindi (Native Proficiency)
